DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention features an apparatus and method for writing time-relevant-data to a non-volatile memory of an electronic apparatus comprising a controller and a non-volatile memory coupled to the controller.

Closed related prior art teaches similar co-relating features:

US 6,711,054 (Kanamitsu et al) teaches memory system and method to eliminate restrictions on the number of writes within the range of endurance to rewriting, thereby improving the reliability of additionally written data.

US 6,579,231 (Philipps) teaches personal medical monitoring unit and system wherein a GPS receiver is programmed to write current coordinates to a place in PDU memory at fixed intervals of time (i.e., once per minute).

US 5,708,605 (Sato) teaches nonvolatile semiconductor memory device having variable writing and erasing time periods establishing relationship between the number of writing operations and the writing time period wherein writing operation are performed upon a selected memory cell for a definite time period.

However, none of the prior art of record teaches or renders obvious the features of the claims, specifically:

providing at least two different addresses of memory blocks of a non-volatile memory for storing data referring to a same time unit; storing a first time-relevant data to the first memory block referring to a time unit once every a time unit; and storing a second time relevant data to the second memory block referring to said time unit once every the same time unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
